FRENCH DOOR BROCHURE

European CE Certification

A Good Door

Must be a perfect combination of design,
materials, craftsmanship, and after-sales service.
It can't be viewed simply as a single entity;
it's a brilliant interpretation of many aspects.
If you're looking for a timeless yet modern design,
this is your best choice.

HOME FURNISHING

Design has no boundaries; it originates from life and returns to life.
Incorporating detailed elements into a door creates a visual experience of the beauty of life.

Durability

200,000 times of bearing 150KG and simultaneously testing the shrinkage and aging of the sealing strip; over 200,000 times of opening and closing test

Airtightness

Effectively control the gap wind entering the room and greatly improve the thermal insulation performance g1≤0.5

Soundproofing

All-round sound insulation reduces noise levels to a comfortable level. 35≤Rw+Ctr<40

Health and Environmental Protection

Suitable for different groups of people, healthy, environmentally friendly, non-toxic and safer, formaldehyde detection meets the national standard EO level standard

Security

EN-W3 European standard EN-W3, anti-theft time 40-30min

Wind Resistance

The strong structure and wind-resistant components greatly improve the compressive strength of the door p3>5.0

Watertightness

Residents in high-rise buildings and typhoon-prone areas can also easily use AP>700

Thermal Insulation

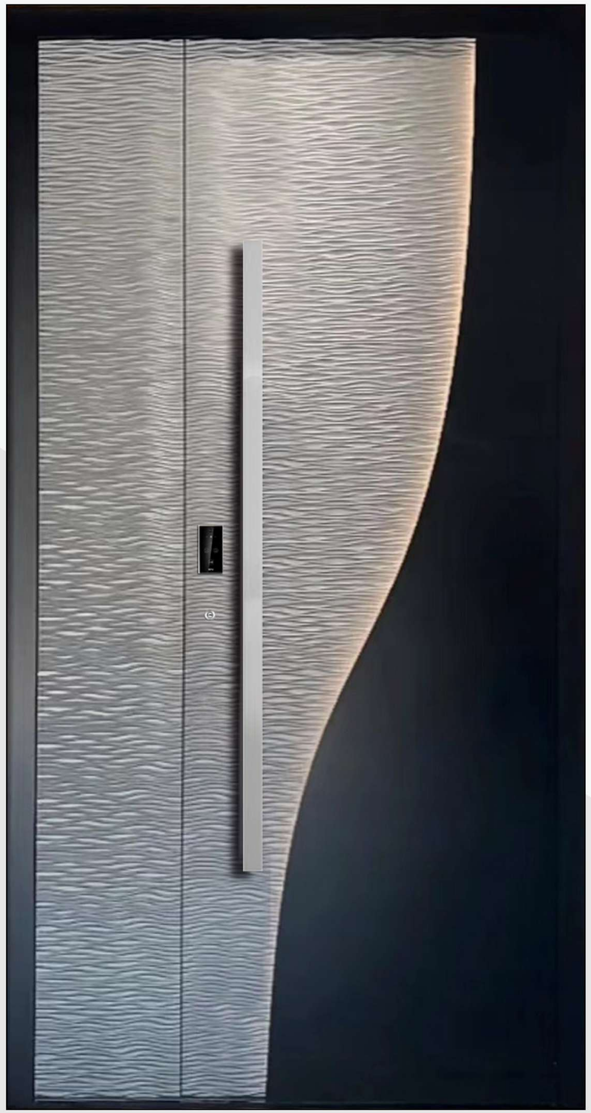
Filled with B1 flame retardant board, thermal insulation reaches European passive standard 1.6>K>1.3

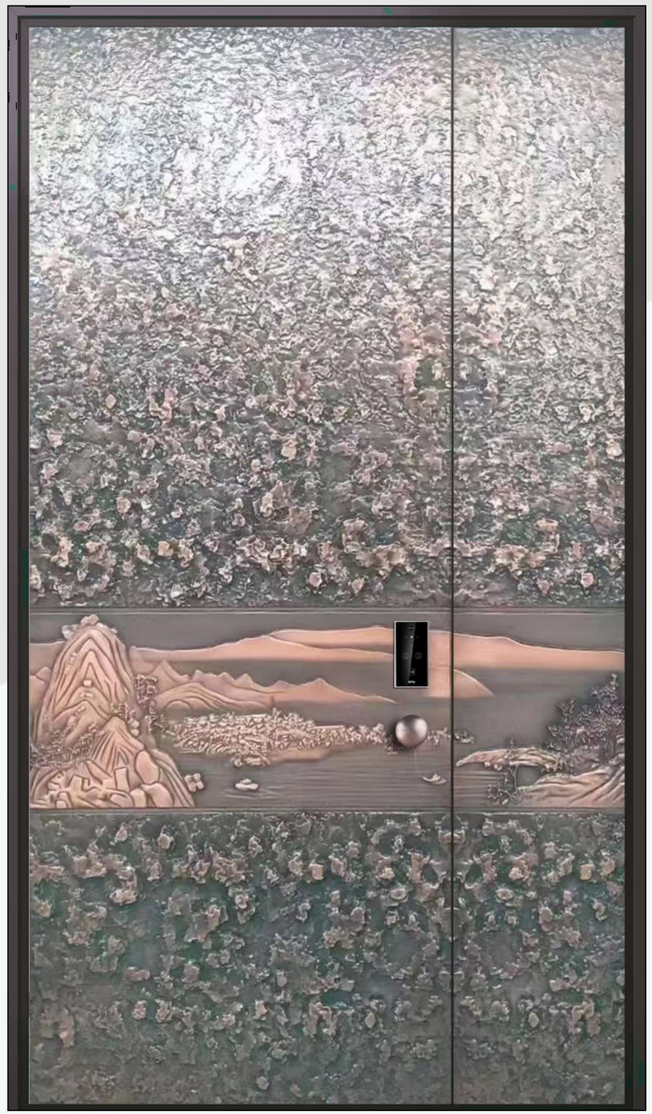
THE FOUNDER OF

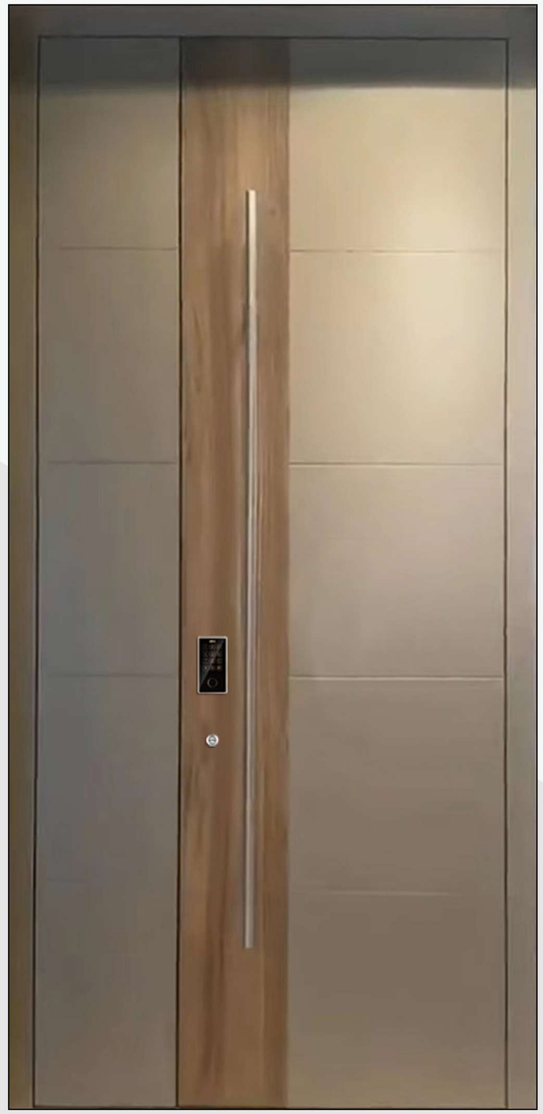
CONCAVE-CONVEX

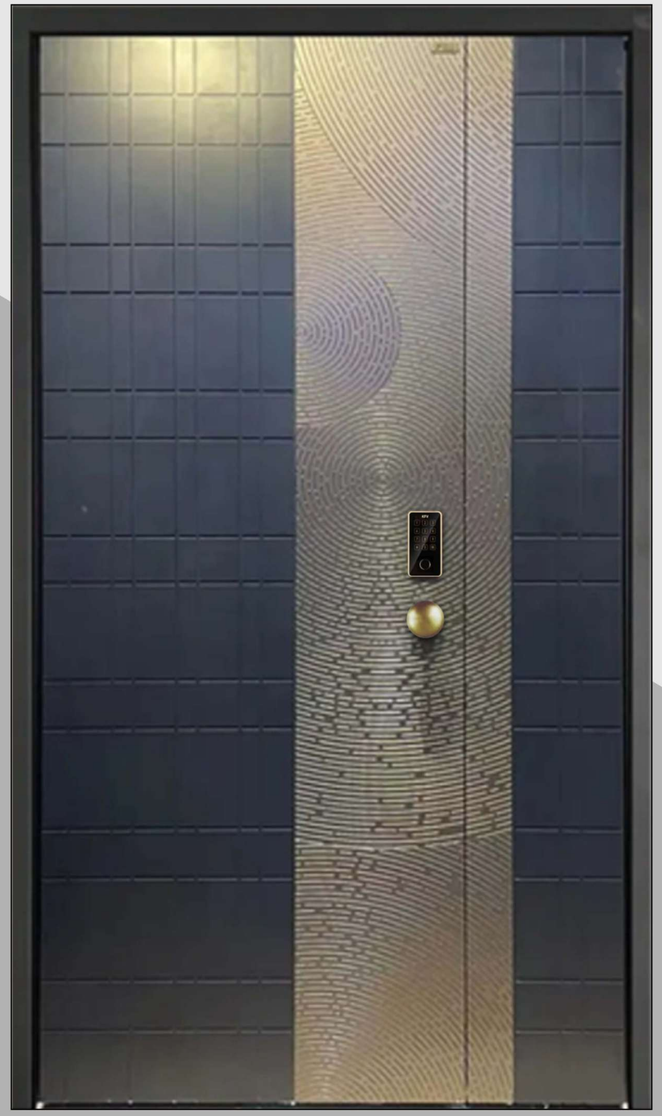
STYLE

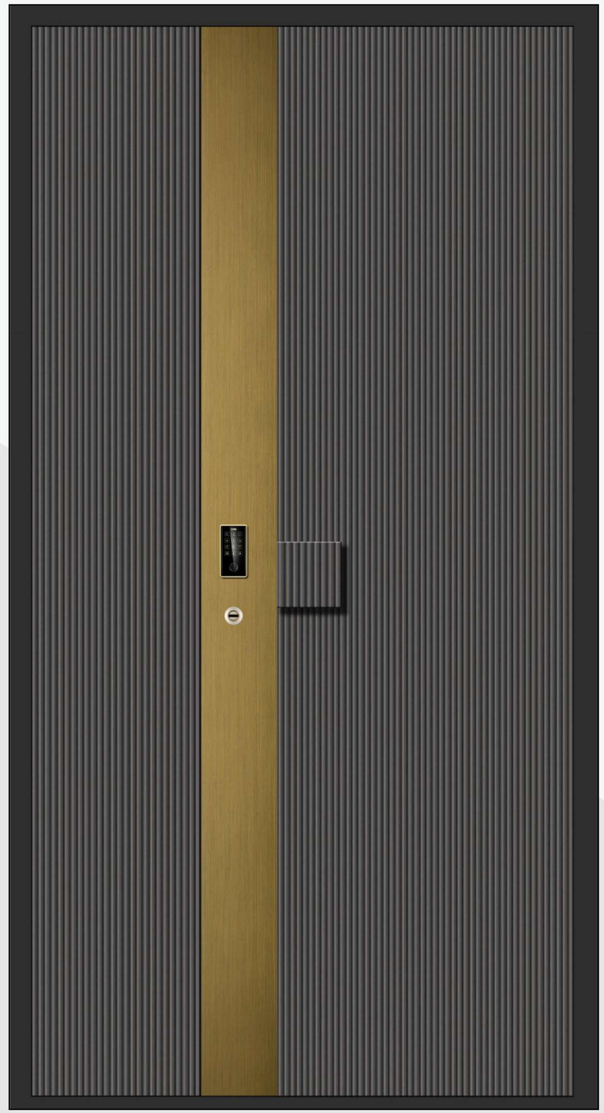
The peaks of triumph and valleys of resilience. Like the interplay of concave and convex, every journey oscillates between defining moments. We craft portals that immortalize this odyssey: doors bearing witness to your struggles and glories, forged to withstand time while proclaiming your lineage’s unwavering spirit.

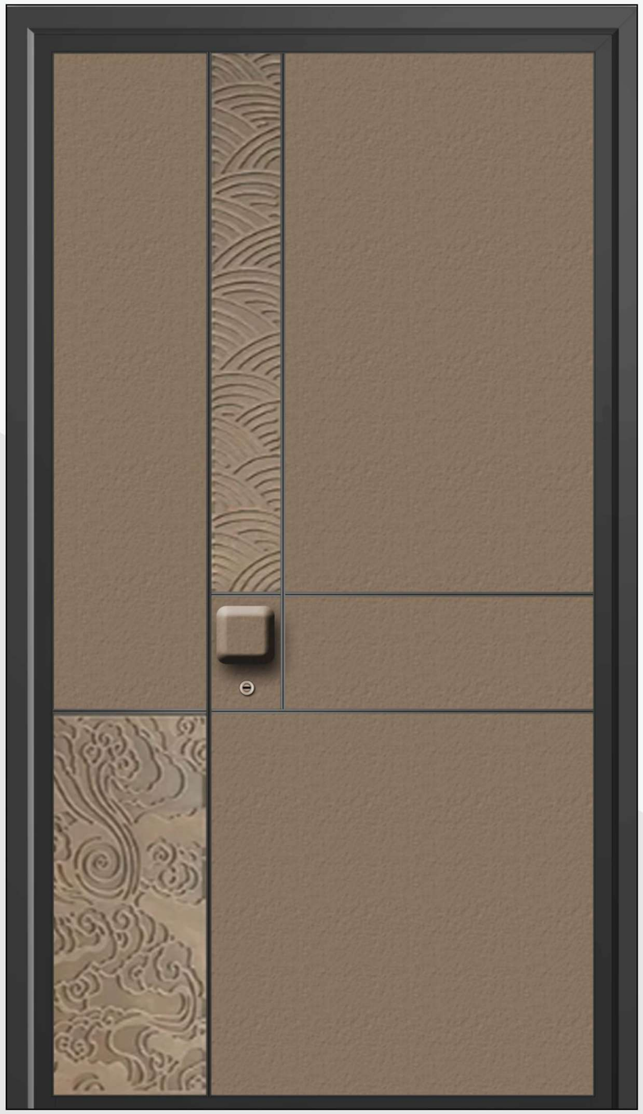


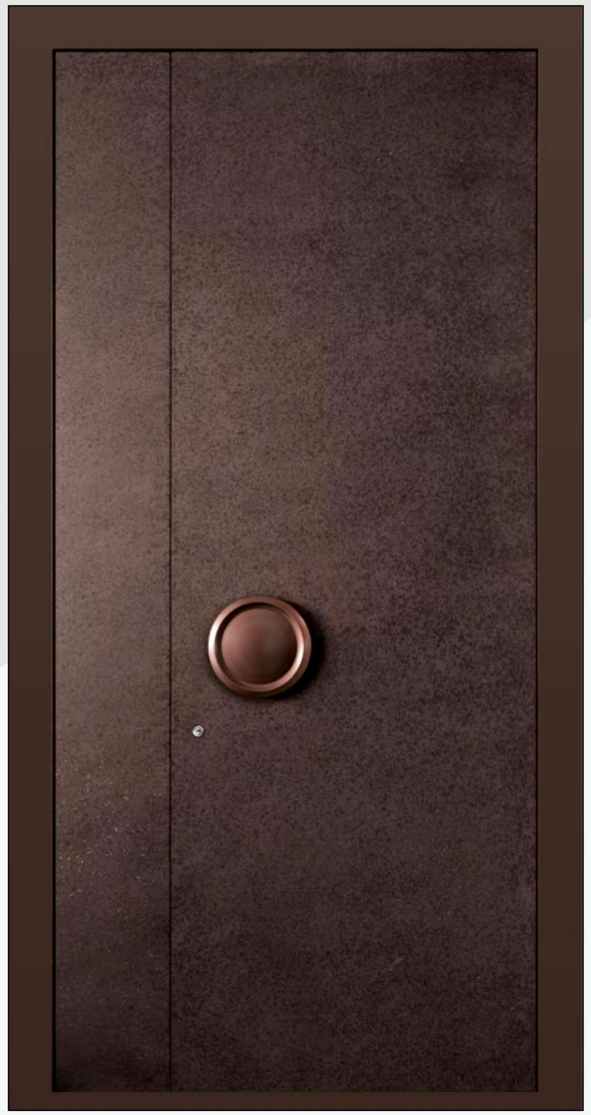


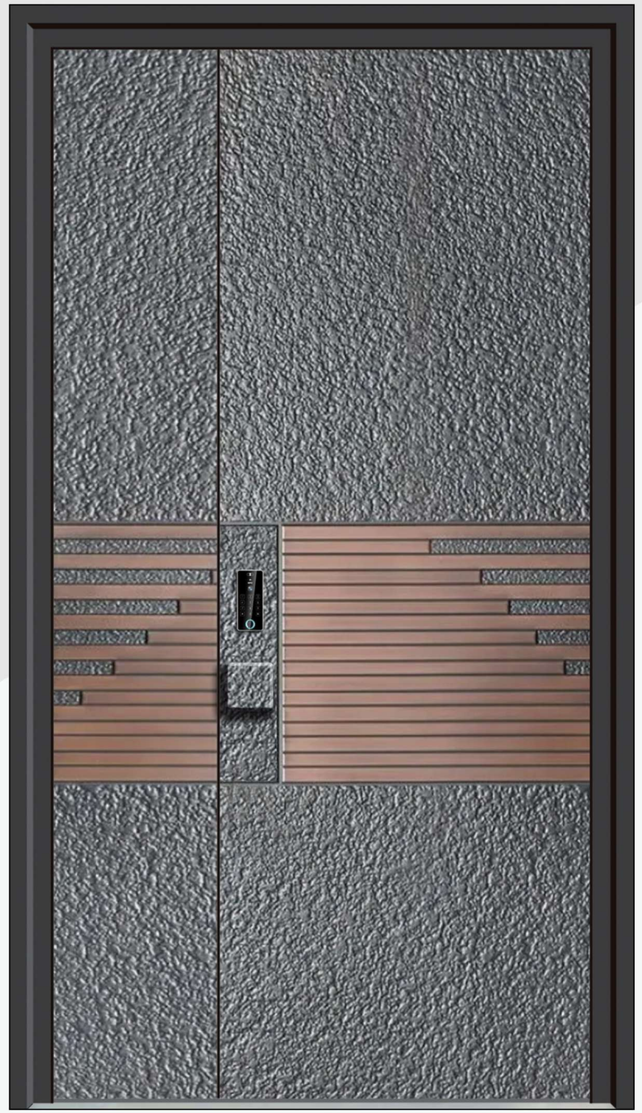


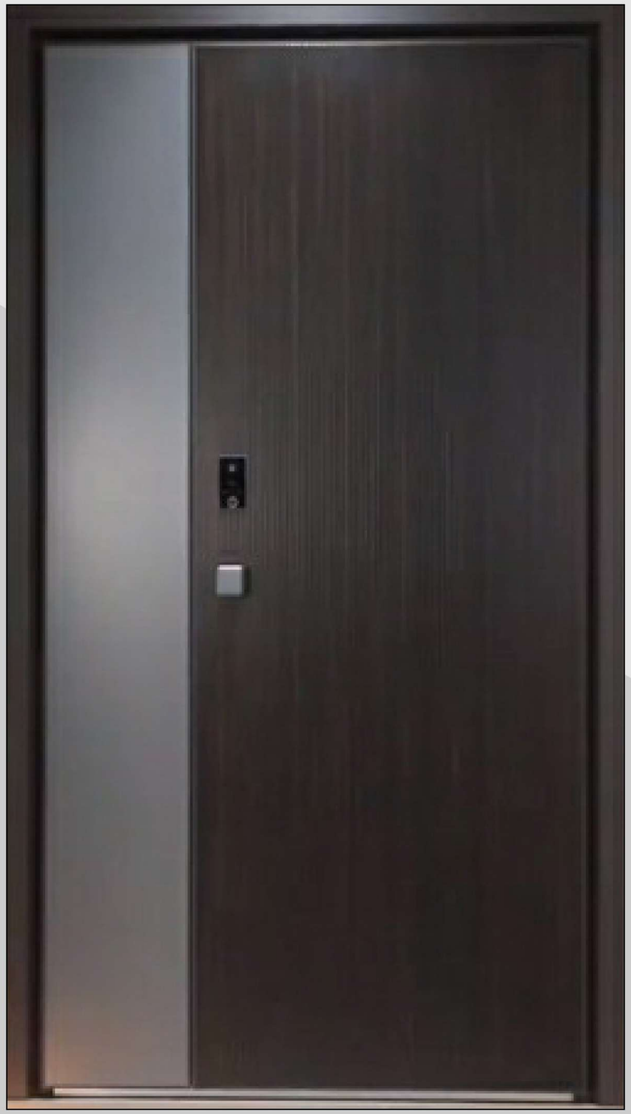


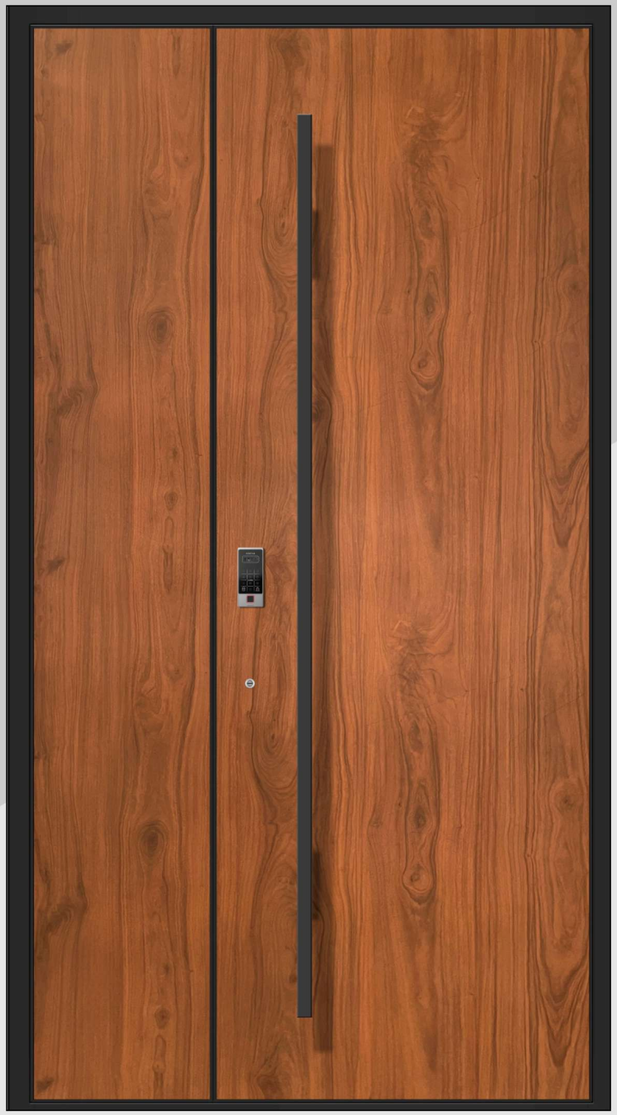


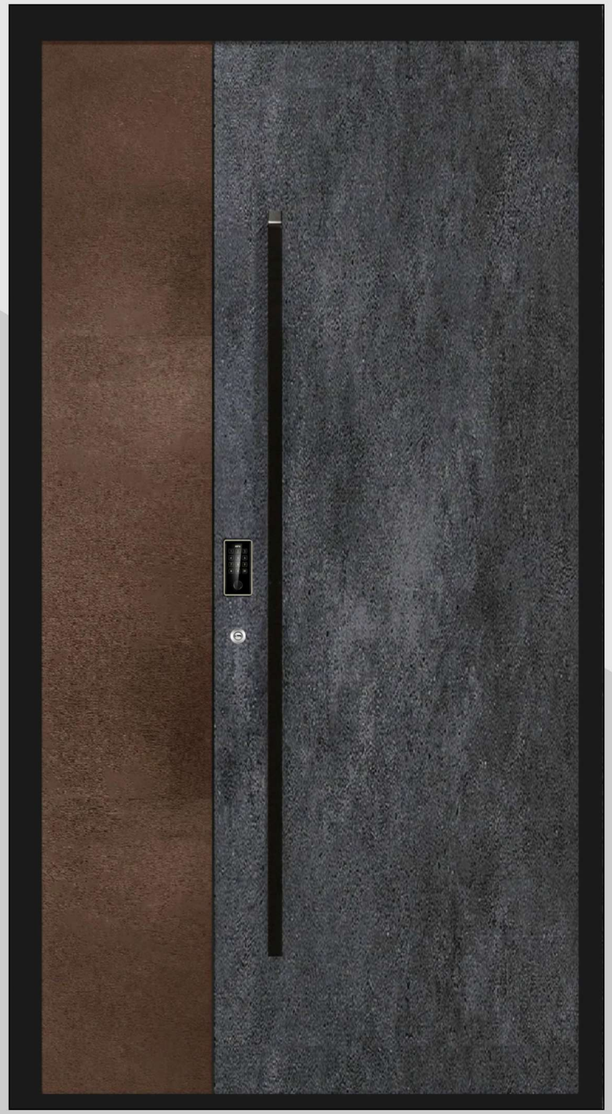


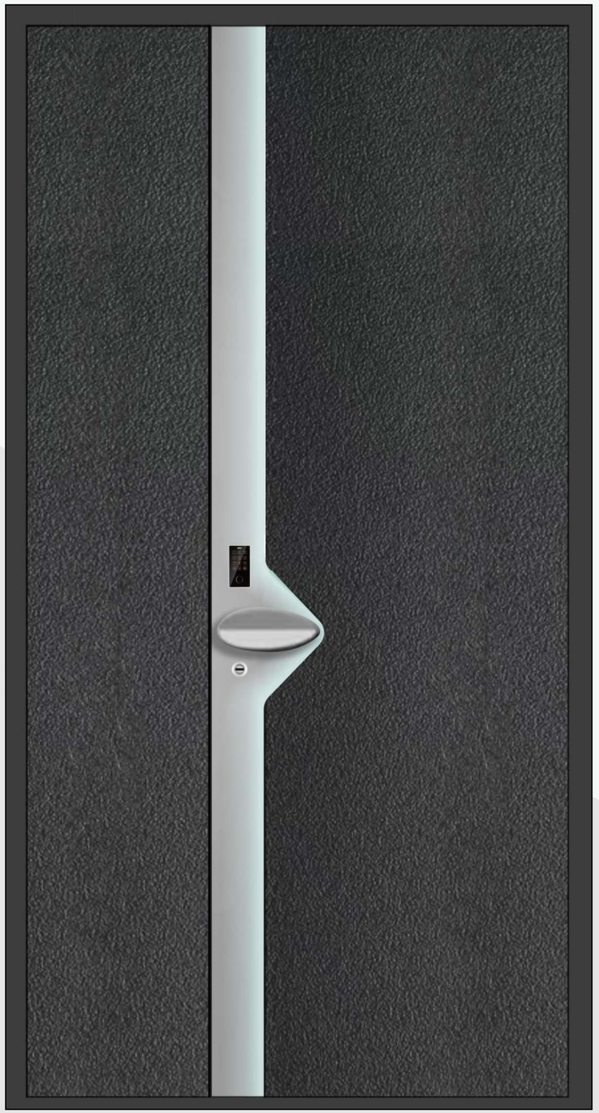


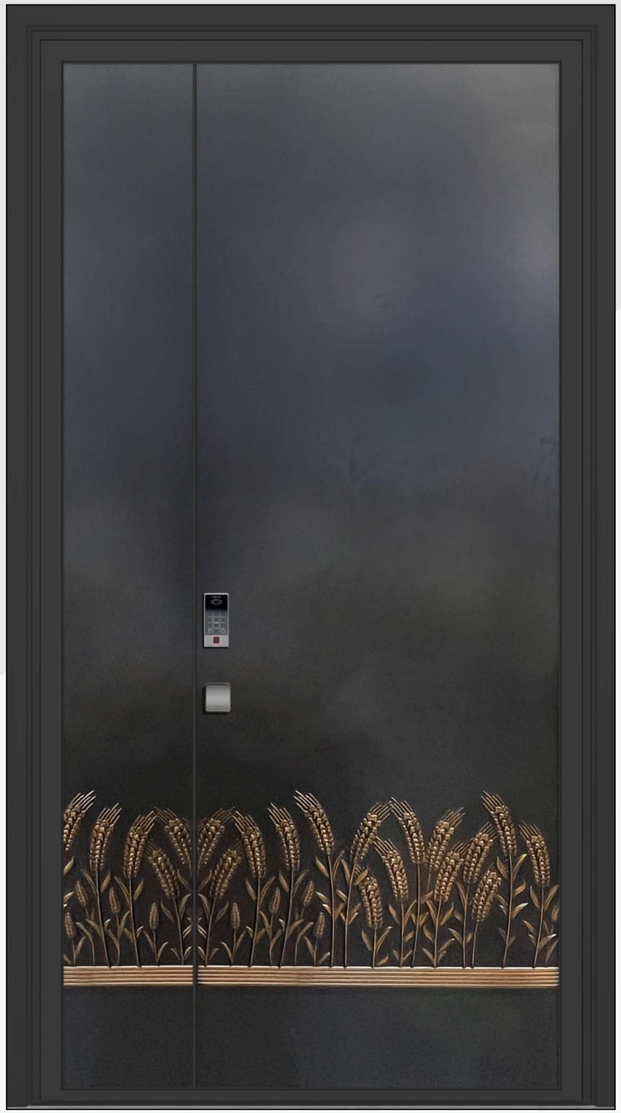


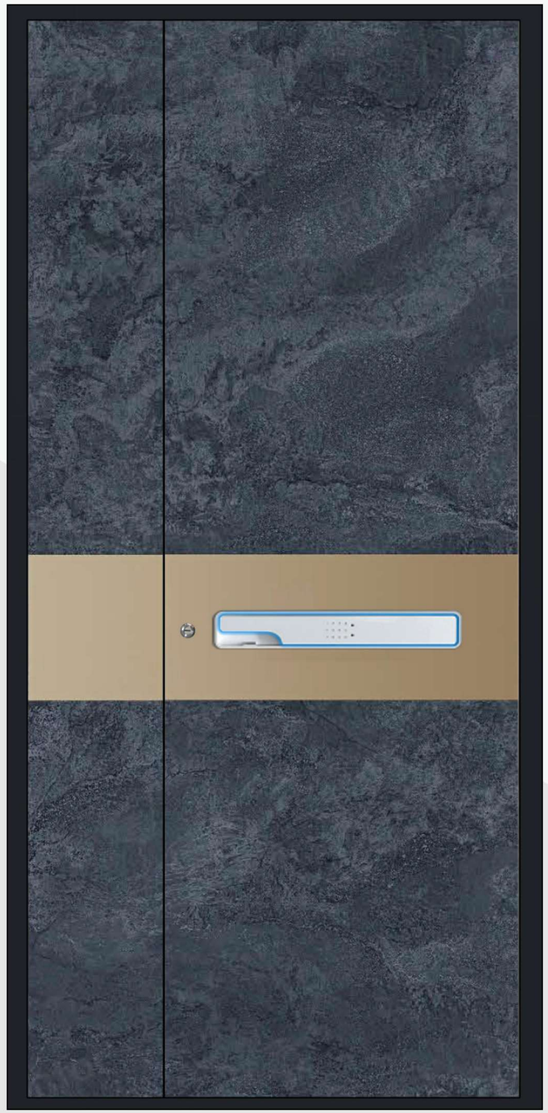


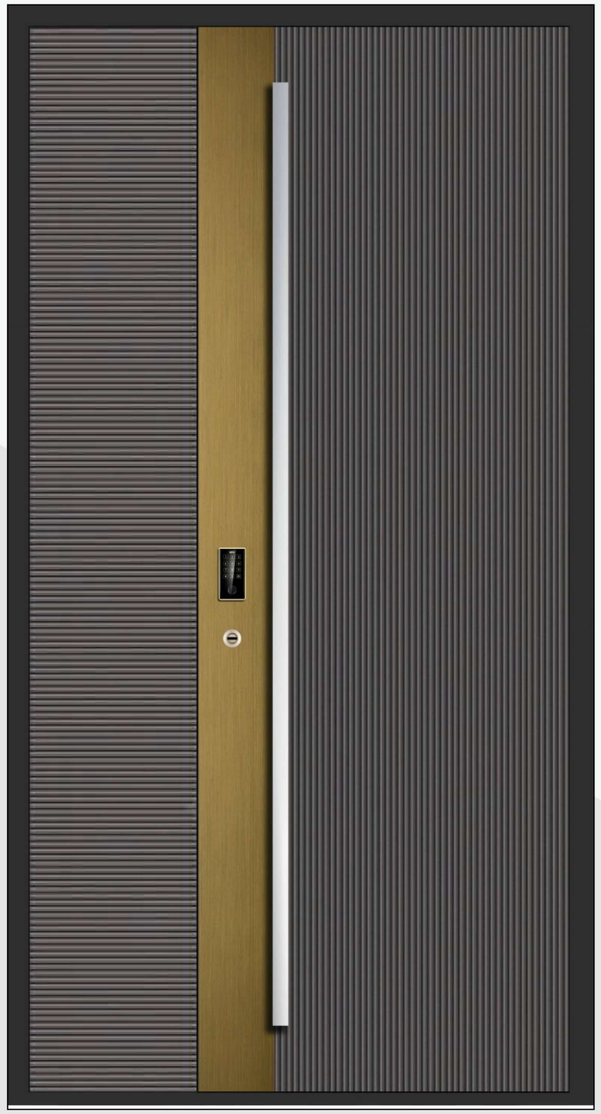


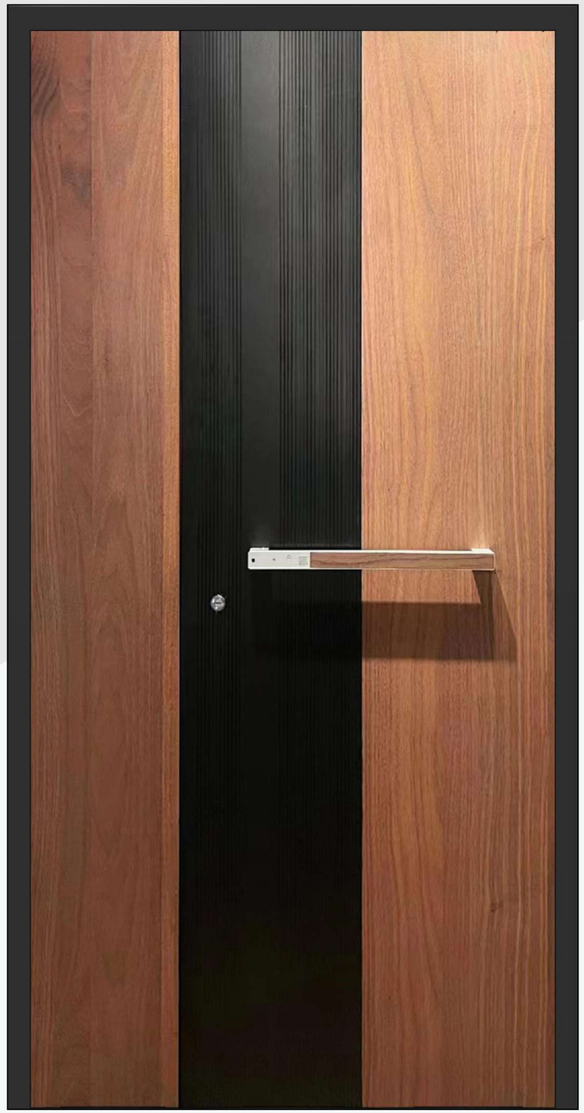












HAPPY FAMILY
